

Force-field error

*energy model not transferable
to the site*

Mg-MOF-74 & HKUST-1 + CO₂
(open metal sites)

Reference-observable mismatch

*literature number is a
different observable*

MFI + Kr
(Q_{st} from a van't Hoff fit)

Structural blocker

*calculation uses the wrong
material state*

cationic zeolites (5c)
(missing cations / structures)

Ensemble / method mismatch

*calculation samples a
different partition function*

Na-Rho (5b)
(rigid closed vs open trapdoor)

Schematic - canonical branch examples, no data values
