

A. Classical repels overlaps; MACE does not

B. A few OOD insertions dominate K_H

GOVERNED MLIP-WIDOM VERDICT

system : Si-CHA (all-silica chabazite, IZA) + Ar
 guest/T : Ar / 298.15 K
 MLIP : mace_mp small (0.3.16/2.12.0+cpu)
 checkpoint: 2ddb079cee0e131e
 seed / N : 0 / 100

flagged insertions : 79/100 (79%)
 flagged Boltzmann wt : 99.3%
 K_H proxy (all) : 55.47
 K_H proxy (OOD removed): 1.74
 -> inflation factor : 31.8x

VERDICT: REFUSE

OOD insertions dominate the Boltzmann average; MLIP-Widom K_H is not trustworthy.
